The U.S. Department of Health and Human Services has established a "Privacy Rule" to help ensure that personal health care information is protected for privacy. The Privacy Rule was created in order to provide a standard for certain health care providers to obtain their patients' consent for uses and disclosures of protected health information (PHI) about the patient, in order to carry out treatment, payment or health care operations.

As our patient, we want you to know that we respect the privacy of your personal medical records and will do all we can to secure and protect that privacy. We strive to take reasonable precautions to protect your privacy. When it is appropriate and necessary, we provide the minimum information to only those we feel are in need of your health care information, treatment, payment and/or health care operations, in order to provide health care that is in your best interest.

We also want you to know that we support your full access to your personal medical records. We may have indirect treatment relationships with you (such as laboratories that only interact with physicians and not patients), and we may have to disclose PHI for the purposes of treatment, payment, or other health care operations. These entities are most often not required to obtain patient/guardian consent.

You may refuse to consent to the use or disclosure of your PHI, but this must be in writing. Under the law, we have the right to refuse to treat you, should you refuse to disclose your PHI. If you choose to give consent in this document, at some future time, you may request to refuse all or part of your PHI. You may not revoke actions that have already been taken which relied on this or a previously signed consent.

### **Your Health Information Rights**

We may deny your request for an amendment and if this occurs, you will be notified of the reason for the denial.

**COMPLIANCE ASSURANCE NOTIFICATION FOR OUR PATIENTS**

To Our Valued Patients:

The misuse of PHI has been identified as a national problem causing patients inconvenience, aggravation, and money. We want you to know that all of our employees, managers, and doctors continually undergo training so that they may understand and comply with government rules and regulations regarding the Health Insurance Portability and Accountability Act (HIPAA) with particular emphasis on the "Privacy Rule". We strive to achieve the very highest standards of ethics and integrity in performing services for our patients.

It is our policy to properly determine appropriate use of PHI-in accordance with the governmental rules, laws, and regulations. We want to ensure that our practice never contributes, in any way, to the growing problem of improper disclosure of PHI. As part of this plan, we have implemented a Compliance Program that we believe will help us prevent any inappropriate use of PHI.

We also know that we are not perfect! Because of this fact, our policy is to listen to our employees and our patients without any thought of penalization if they feel that an event in any way compromises our policy of integrity.
